KPSI 30

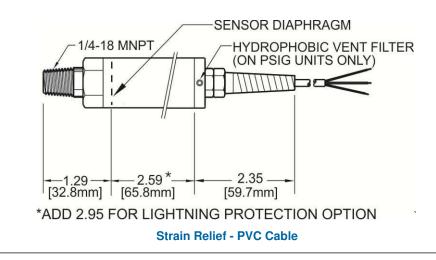

- Non-Submersible Pressure Transducer
- ±0.10% FSO Static Accuracy
- Multiple Pressure Connections
- Two Year Warranty

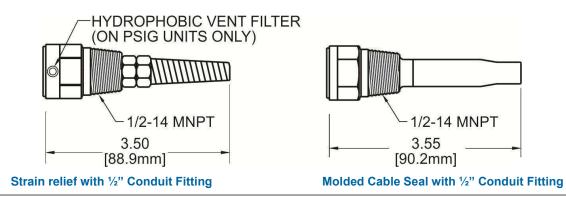

The KPSI 30 is a non-submersible pressure transducer specifically designed for demanding industrial applications where the primary criteria are reliability and economy. These units provide repeatable, precision measurements under the most hostile conditions. Capable of measuring vacuum to pressure as high as 500 psi (3450 kPa), these transducers can meet most any industrial pressure measurement requirement and are available with an overmolded cable exit option for splash down applications (IP 67).

All KPSI Transducers utilize a highly accurate pressure sensor assembly specifically designed for hostile fluids and gases. The assembly is integrated with supporting electronics in a durable housing constructed of 316SS or Titanium. A wide variety of electrical and pressure connections are available to accommodate most any system interface.
