The KPSI 351 submersible hydrostatic level transducer is specifically designed for small bore applications and to meet the rigorous environments encountered in ground water level measurements. Designed and tuned to meet stringent USGS OSW specifications of ± 0.01 Ft. H_2O often required by governmental regulatory agencies and research institutions. The KPSI 351 incorporates a highly stable media-isolated sensor, and features SDI-12 serial-digital interface. SDI-12 is a standard for interfacing data recorders with microprocessor-based sensors, especially in the environmental monitoring field.

The KPSI 351 is an excellent solution for applications that require minimal current drain. It will accommodate cable lengths between sensors and recorder up to 1000 feet. The removable cable option allows easy substitution of transducers and cables. A New

Ordering Information

Notes:

- The part number requires two level range limits, corresponding to the maximum and minimum analog outputs of the transducer, to be specified in **pounds per square inch (psi)** to three decimal places. The lower level range is typically 000.000 unless otherwise required. For reverse output requirements, enter the lower level range for the maximum output signal and the upper range for the minimum output. Use the following conversion factors: Ft. H_2O / 2.3073 = psi // m H_2O / 0.703265 = psi Examples: 10 ft. H_2O / 0.23073 = 4.334 psi (Enter 004.334 in the part number), 10 m H_2O / 0.703265 = 14.219 psi (Enter 014.219 in the part number) For sealed gage reference add local atmosphere when converting to psi. Contact PSI for assistance. Example:10 ft. H_2O / 0.23073 + 14.7 = 19.034 psi (Enter 019.034 in the part number)
- Units of measure on standard MEAS label. Contact Measurement Specialties if private labeling is required.
- Removable / Armored Cable must utilize Electrical Connection R only. Removable / Armored cable must be ordered as separate 859 Removable Cable Assembly Part Number (see guide on page 2).
- 1/4" MNPT cap is only available in Stainless Steel and for ranges below 100 PSI
