

## BCIC

### Dead End and Suspension Clamp Covers

BCIC covers for Dead End connection points and Suspension Clamps protect energised lines from perching, landing and nesting birds.

When used together with an overhead line cover they combine to make an effective insulation enhancement system against accidental phase-phase or phase-ground touches.

They use the same high performance material as the Birdcaps and substation BCIC's and are suitable for MV Poles and HV Towers.

#### Selection Information: dimensions in millimetres

| Bushing Covers       | Product Dimensions in inches (mm) | Application |
|----------------------|-----------------------------------|-------------|
| BCIC-9/10/3-L (B3)   |                                   |             |
| BCIC-10/13.5-L (B3)  |                                   |             |
| BCIC-4.75/11-3 (B12) |                                   |             |
| BCIC-7/20-4 (B6)     |                                   |             |
| BCIC-H3-2-7(B12)     |                                   |             |
