

RRGS

Polymeric and Porcelain Rigid Red Guano Shield

The rigid red guano shield protects against bird streamer caused outages. There are designs to fit both porcelain bells and polymeric insulators. This two piece shield attaches easily with plastic bolts and nuts around the top of the insulator and provides protection from fecal contaminates coming from above the insulator string. For both applications there are 450 mm and 600 mm diameter shield designs.

Superior high-voltage outdoor materials are used in the RRGs shield design. The rugged, non-tracking, UV-resistant, high temperature polymer ensures long-term performance even in the most extreme environmental conditions.

There are a wide range of problems related to fecal contamination on other equipment arrangements. For further assistance, contact your local TE representative.

Selection Information: dimensions in millimeters

Catalogue Number	Insulator Type	Shield Diameter
RRGS-35/470-FT (B12)	Polymeric	450
RRGS-35/600-FT (B3)	Polymeric	600
RRGS-35/470-M (B12)	Porcelain	450
RRGS-35/600-M (B3)	Porcelain	600
