-770

CBRN Fluoroelastomer Molded Component

Product Facts

- Hardened to withstand effect of NBC decontamination agents including DS-2 and STB
- Tested in live agent tests with HD, VX and TGD for interior and exterior exposure
- Meets the demands of flammability and fluid resistance of current military around vehicles
- Offered with compatible tubing, adhesive, wire and other harness components for a survivable system

Applications

-770 heat shrinkable molded shapes are made of a chemically resistant fluoropolymer that is suited for use where moisture, fungus and vehicle fluids and fuels are a concern. Chemical resistance has been tested in accordance with Army TOP 8-2-510 for NBC Contamination Survivability.

Installation

Boots shrink with temperatures in excess of 150°C

Product is provided with a minimum 2:1 expansion ratio

Optimum application range is 10% above recovered ID to 85% of the expanded ID for all openings.

Operating Temperature Range

-55°C to 125°C [-67°F to 257°F]

Available in:	Americas	Europe	Asia Pacific
