

Type RU73 Series

Key Features

High precision -
TCR 2ppm/°C and
3ppm/°C

Tolerance down to
0.01%

Thin film
(nichrome)

Available in
standard and high
power versions

Terminal finish –
electroplated 100%
matte Sn

Moisture sensitivity
level - MSL1

Applications

Communications

Industrial Controls

Instrumentation

Medical

TE Connectivity are proud to introduce this ultra-high precision thin film chip resistor, sister to our successful RN73 series. With tolerances from 0.01% to 0.1% and TCRs of $\pm 2\text{PPM}$ and $\pm 3\text{PPM}$ this takes the chip resistor into new areas of stability and precision. Available on tape and reel for automatic insertion processes, the RU73 is available in 7 case sizes, with a higher power version available for 0603 to 2010 sizes

Note: SMD (Surface mount devices) resistors and inductors should be kept in their original packaging to protect them from ESD (Electrostatic Discharge). The full reels can be broken into smaller quantities, without exposing them to ESD, as long as the components are still in the plastic or paper tape. These resistors and inductors should not be removed from the plastic or paper tape unless they are in an ESD protected environment.
