- Easy Installation by hand or live line methods, no need for any special tools

TE Connectivity are a leader in the design and supply of Helical Fittings for use on Utility and Distribution Networks across the ANZ region.

TE Connectivity can provide a wide range of WrapTEr helical terminations, joints, protection, restoration, repair and support fittings for use on bare and insulated overhead conductor. Each fitting is custom designed for a particular conductor range and type.

All fittings are manufactured from premium materials, which are compatible with the materials used in the conductor / cable onto which they are applied. This ensures maximum electrical and mechanical performance, whilst minimising corrosion potential.

Armour Rods are designed to be used as protection against bending, compressive stresses, abrasion and arcing damage on conductors.

**Customers can count on consistent, high quality products, driven by TE's proven innovation and backed by our extraordinary customer support.**
