RNF-100

Raychem

Flexible, flame-retardant, high performance, polyolefin heat-shrinkable tubing

RNF-100 tubing is a high-quality, heat-shrinkable product for a wide variety of uses. It has become the industry standard for insulation, strain relief, wire bundling, and color-coding in both commercial and military applications. RNF-100 tubing meets the requirements of AMS-DTL-23053/5, Class 1 (colors) and Class 2 (clear).

It is also UL-recognized and CSA-certified at 125°C, 600 V.

Made from flame-retardant polyolefin, RNF-100 tubing has excellent physical, chemical, and electrical properties that meet industrial and military requirements for a highly reliable, general-purpose tubing. It sets itself apart in that it offers a higher level of performance at elevated temperature, including mechanical abrasion and fluid resistance, than many heat-shrinkable polyolefin tubings available in the marketplace today.

Only a few sizes of RNF-100 tubing are required to cover many substrate diameters.

Temperature rating

Minimum shrink temperature:	121°C
Continuous operating temperature:	-55°C to 135°C

^{**}Wall thickness will be less if tubing recovery is restricted during shrinkage.

Ordering information

Colors	Standard	Black (all sizes); clear, white, red, blue, green, and yellow (3/64" through 3")				
	Nonstandard	Clear, white, red, blue, and yellow (4" and 5"); brown, orange, violet, and gray (all sizes)				
Size selection	Always order the	largest size that will shrink snugly over the component being covered.				
Standard packaging	On spools or in 4	foot lengths				
Ordering description Specify product name, size, and color; for example, RNF-100-1/4-BK (BK=Black).		ame, size, and color; for example, RNF-100-1/4-BK (BK=Black).				

^{*}When ordering, always specify latest issue.
