PRODUCT NEWS ALL-WET SERIES CONNECTOR ENHANCEMENTS

INTRODUCTION

As part of our continuous improvement process the **SEACON** Group consistently reviews it's product ranges through both customer feedback and internal improvements. It is via these processes that **SEACON** identified a design enhancement to the **ALL-WET** connector ranges.

DESIGN FEATURES

The design change is associated with the Male Pin connectors only and has been introduced to improve and extend the life of the connectors by decreasing the stresses that are applied to the sealing interface between the male contact pin and the sealing rubber around the pin during the connectors mate and de-mate cycles.

The newly designed male contact has a "Lead in" as part of the contact pin itself which replaces the current rubber lead in. The introduction of the new pin removes any potential wear to the sealing interface between the male contact pin and the sealing rubber around the pin which may occur with many repeated make and breaks of the connector pairs. The new pin will maintain the full connector sealing properties and will provide a greater life expectancy of the connectors.

The incorporation of this design change to the Male Pin connectors will not affect the existing Female Socket connectors currently being used by **SEACON**'s customers and therefore full intermateability will be maintained. In addition, **SEACON** would also like to confirm that pricing will also not be affected.

Please note that the new Male Pin is not yet available across the entire ALL-WET range. Please contact SEACON for details.

TESTING

This new pin design concept has been fully tested and has been utilized in both the U-MATE and SEA-MATE connector ranges for a number of years.

INTRODUCTION

SEACON'S ALL-WET connector series was developed to provide inexpensive yet reliable rubber molded connectors that allow the user to make and break connections both on the surface and underwater.

Manufactured using only high quality materials, the **ALL-WET** bulk-head connector's metal shell is produced using CA630 per QQ-C 465 as standard, although other materials are available upon request. Contacts are gold plated to ASTM B488 providing superior corrosion resistance.

AVAILABILITY

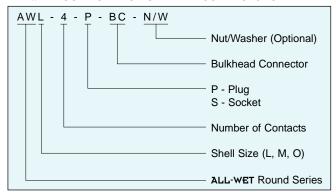

The **ALL-WET** range offers four different style types; round (AW), split (AW), flat (FAW) and miniature hermaphroditic (MAW) with a number of configurations ranging from 2 to 54 contacts rated upto 50 amps maximum current (dependent on cable) and a mated pressure rating of upto 20,000 psi.

APPLICATIONS

The ALL-WET series is suitable for a variety of applications including underwater television and lights, diver communications, ROV systems, recreational submersibles, towed-array cable systems, current meters, animal migration and research and food processing equipment.

PART NUMBER SYSTEM - EXAMPLE

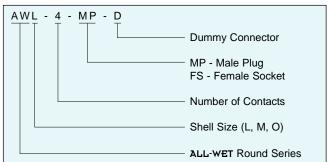

ALL-WET ROUND SERIES BULKHEAD CONNECTORS

ALL-WET ROUND SERIES IN-LINE LOCKING SLEEVES

ALL-WET ROUND SERIES DUMMY CONNECTORS

SPECIAL ASSEMBLIES

SEACON maintains all facilities necessary to furnish complete underwater and environmental electrical connector/cable systems, including Research and Development, Engineering, Manufacturing, Quality Control and Pressure Testing.

As well as supplying our standard 'off-the-shelf' items, we have the capability to design and manufacture SPECIAL CUSTOMIZED CONNECTORS AND CABLE ASSEMBLIES to suit your individual needs.

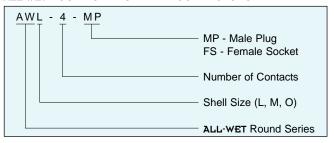

SEACON also prides itself with the ability to perform stringent quality conformance testing procedures which are in accordance with the MIL-SPEC programs.

NOTE:

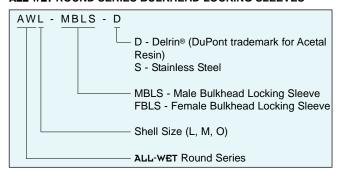

ALL-WET connectors are intended to mate with **ALL-WET** connectors only. Although the **ALL-WET** and **WET-CON** connectors look similar, the numbering pattern and color codes are not the same.

We recommend, as general practice, to verify color code and pin location before installation.

ALL-WET ROUND SERIES IN-LINE CONNECTORS

ALL-WET ROUND SERIES BULKHEAD LOCKING SLEEVES

= TE connectivity

GENERAL INFORMATION

COMPONENT	MATERIAL
	CA630 per QQ-C-465 Many materials including 316 Stainless Steel and Glass Reinforced Epoxy (GRE). Other materials available on request
CONNECTOR BODY	Neoprene per B/A X5727
CONTACTS	Copper Alloy Gold Plated per ASTM B488
GUIDE PINS	304 Stainless Steel
O-RINGS	Nitrile (formerly known as Buna N)
IN-LINE CABLE	#18 AWG SO as standard
BULKHEAD PIGTAILS	Teflon® (registered trademark for DuPont) type E hook-up wire

CATEGORY	VALUE
OPEN FACE PRESSURE	Up to 1,000 psi (contact SEACON for higher ratings)
MATED PRESSURE BULKHEADS	Up to 10,000 psi
MATED PRESSURE IN-LINES	20,000 psi
VOLTAGE	600 VDC based on standard cable (contact SEACON for higher ratings)
CURRENT	Up to 50 amps per contact available. Please contact SEACON
CONTACT RESISTANCE	<0.01 ohms
INSULATION RESISTANCE	>500 megohms after wet mating

NOTES:

- · Locking sleeves are at additional charge and must be specified. We recommend that bulkhead locking sleeves are specified to be installed at the factory.
- · Bulkhead nut/washer is not standard and must be ordered separately. Available in Stainless Steel although other materials are available on request.
- · In-line cable and hook up wire is 18 inch as standard, longer lengths to be specified when ordering.
- · Please contact SEACON for your non standard cable requirements. Some cables may require terminating to a bulkhead connector and overmolding.

ALL-WET FLAT SERIES IN-LINE MP CONNECTORS

ALL-WET FLAT SERIES DUMMY CONNECTORS

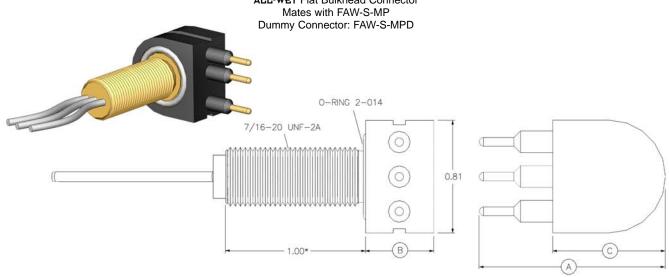

Dummy connectors are available for all connectors in the ALL-WET Flat Series. To order, add the suffix-D after the part number.

connectivity

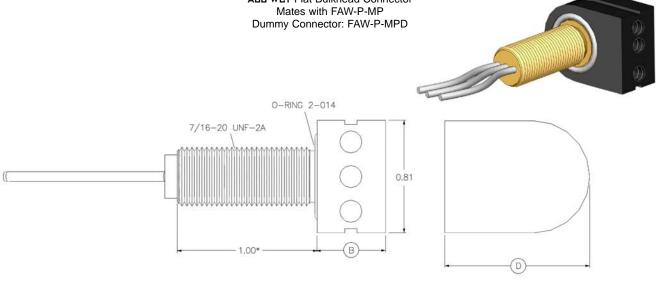

ALL-WET SERIES FAW-P-BC-R/A

ALL-WET Flat Bulkhead Connector Mates with FAW-S-MP

ALL-WET SERIES FAW-S-BC-R/A

ALL-WET Flat Bulkhead Connector Mates with FAW-P-MP

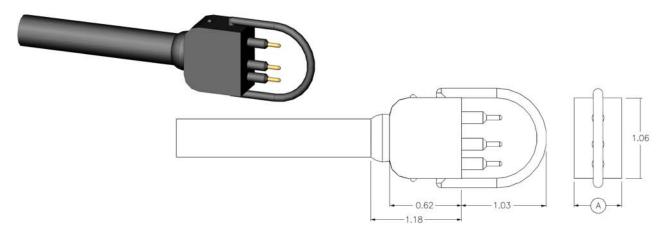

CONNECTOR	A - LENGTH (INCHES)	B - LENGTH (INCHES)	C - LENGTH (INCHES)	D - LENGTH (INCHES)	
FAWL-P/S-BC-R/A	1.34	0.50	0.81	1.05	
FAWM-P/S-BC-R/A	1.48	0.63	0.95	1.12	

- · Thread length is 1.00" standard. If shorter thread is required, specify as follows: FAW-P(or S)-BC-R/A (1/2" thread length).
- Available thread length: 1/2", 3/4" and 1".
 Bulkhead mounting torque: 40 inch pounds.
- · Nuts and washer supplied.
- · Connectors must be lubricated prior to mating.
- · Connectors are designed for installation on one atmosphere vessels. Contact SEACON for recommendations if using compensated vessels.
- Dummy Connectors: Optional.Dummy Shorting Plug: Optional.

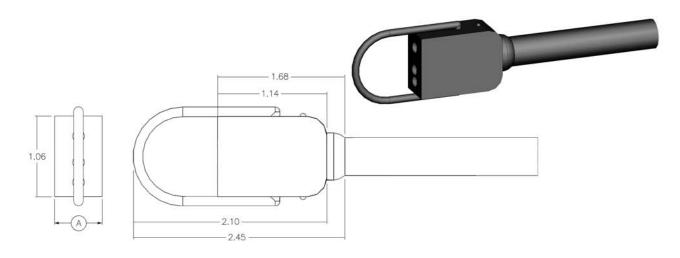

ALL-WET SERIES FAW-P-MP

ALL-WET Flat In-Line Connector Mates with FAW-S-FS and FAW-S-BC-R/A Dummy Connector: FAW-S-FSD

ALL-WET SERIES FAW-S-MP

ALL-WET Flat In-Line Connector Mates with FAW-P-FS and FAW-P-BC-R/A Dummy Connector: FAW-P-FSD

CONNECTOR	A - LENGTH (INCHES)		
FAWL-P/S-MP	0.50		
FAWM-P/S-MP	0.63		

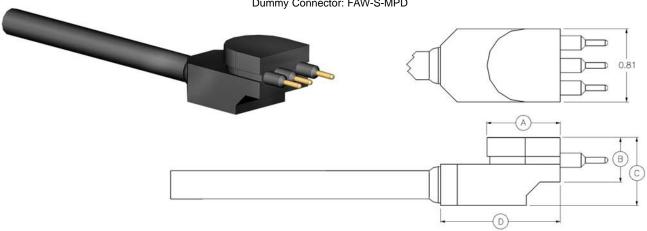

- · Neoprene lanyard wraps around groove on in-line or bulkhead mate.

- Dummy connectors: Optional.
 Dummy Shorting Plug: Optional.
 Connectors must be lubricated prior to mating.

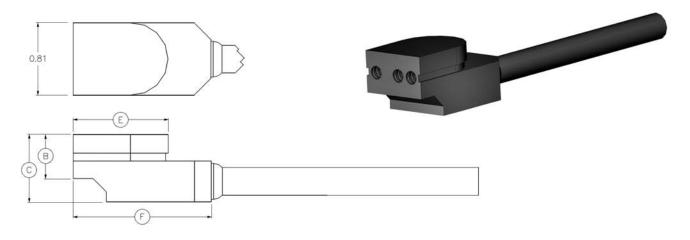

ALL-WET SERIES FAW-P-FS

ALL-WET Flat In-Line Connector Mates with FAWL-S-MP Dummy Connector: FAW-S-MPD

ALL-WET SERIES FAW-S-FS

ALL-WET Flat In-Line Connector Mates with FAWL-P-MP Dummy Connector: FAW-P-MPD

CONNECTOR	A - LENGTH (INCHES)	B - LENGTH (INCHES)	C - LENGTH (INCHES)	D - LENGTH (INCHES)	E - LENGTH (INCHES)	F - LENGTH (INCHES)
FAWL-P/S-FS	0.81	0.50	0.88	1.31	1.05	1.55
FAWM-P/S-FS	0.98	0.63	0.94	1.33	1.15	1.52

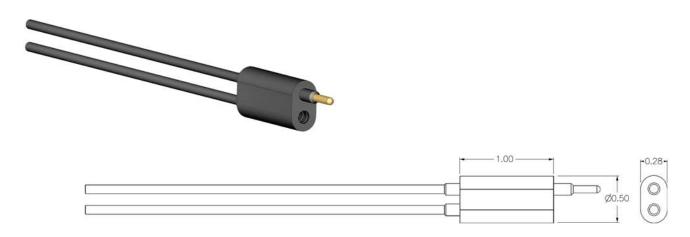

- · Dummy Connector: Optional.
- Dummy Shorting Plug: Optional.
- · Connectors must be lubricated prior to mating.

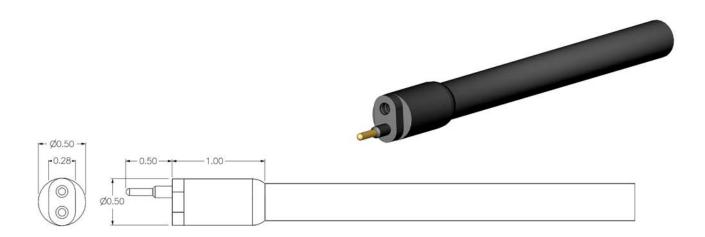

ALL-WET SERIES MAW-2-HC w/IN2 CABLE

ALL-WET Miniature Hermaphroditic In-Line Connector Mates with itself and MAW-2-HC-BC-R/A

ALL-WET SERIES MAW-2-HC w/18/2 SJO CABLE

ALL-WET Miniature Hermaphroditic In-Line Connector Mates with itself and MAW-2-HC-BC-R/A

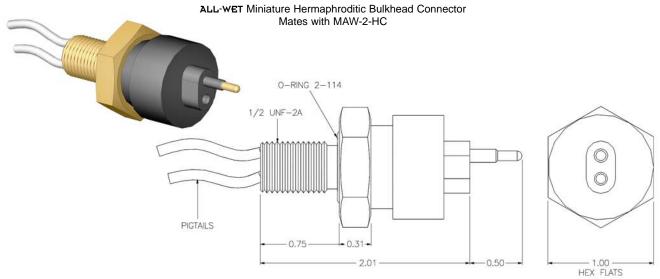

- · Current-carrying capacity: MAW-2-HC w/IN2 CABLE 3 amps per contact. MAW-2-HC w/18/2 SJO CABLE - 7 amps per contact.
- · Operating pressure: 10,000 psi.
- · Open face pressure: 1,000 psi.
- Working voltage: 300 VDC.Dummy Connector: Optional.
- · Dummy Shorting Plug: Optional.
- · Connectors must be lubricated prior to mating.

ALL-WET SERIES MAW-2-HC-BC

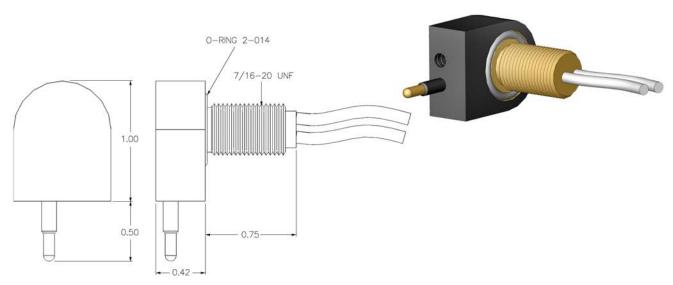

NOTES:

- Dummy connector: Optional.Dummy Shorting Plug: Optional.
- · Pigtails: 18 AWG Type E, 18 inches long.
- · Connectors must be lubricated prior to mating.
- · Nut and washer: Optional.
- · For GRE bulkhead mounting torques please contact SEACON. Torque value referenced in this literature assume installation into dry metal threads. For other applications please contact SEACON for recommendations.
- Connectors are designed for installation on one atmosphere vessels. Contact SEACON for recommendations if using compensated vessels.

ALL-WET SERIES MAW-2-HC-BC-R/A

ALL-WET Miniature Hermaphroditic Bulkhead Right Angle Connector Mates with MAW-2-HC

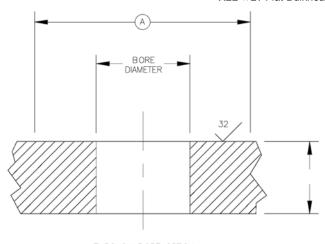

- Dummy connector: Optional.Dummy Shorting Plug: Optional.
- · Connectors must be lubricated prior to mating.
- · Connectors are designed for installation on one atmosphere vessels. Contact SEACON for recommendations if using compensated vessels.

ALL-WET SERIES FAW-P/S-BC THROUGH BORE OPTION

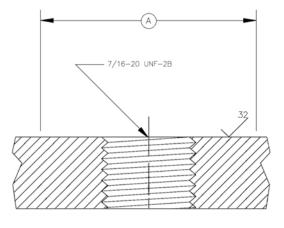

ALL-WET Flat Bulkhead Connector

THROUGH BORE OPTION

ALL-WET SERIES FAW-P/S-BC THREADED MOUNTING OPTION

ALL-WET Flat Bulkhead Connector

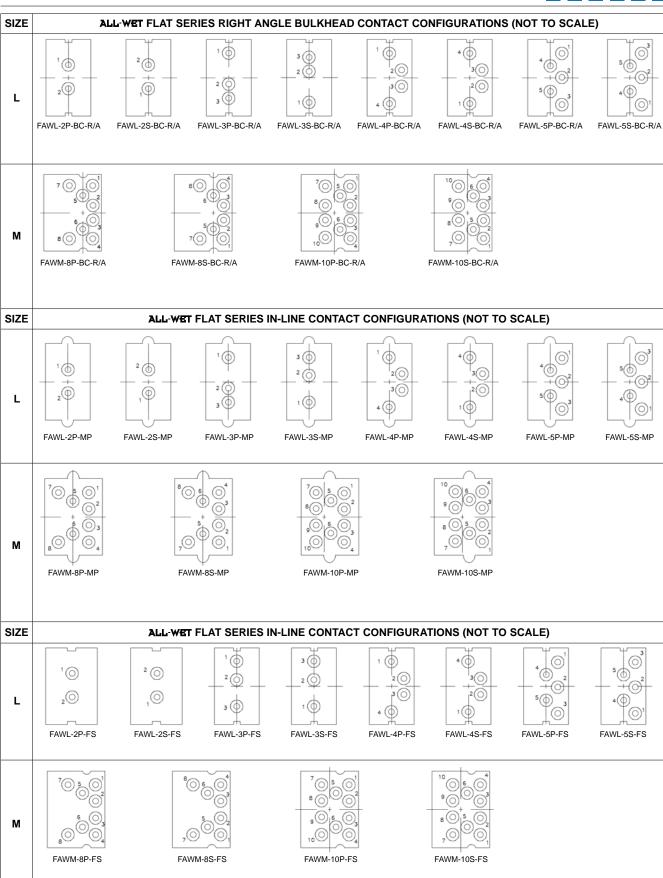

THREADED MOUNTING OPTION

- · A Spot face to 32 finish, minimum diameter 1.25 (to be equal to or greater than connector diameter).
- $\cdot\,$ Bore, through or threaded, must be perpendicular to spot face.
- If threaded mount is used, the lead thread chamfer is not to exceed diameter 0.450.

Even though these procedures appear simple, only qualified technicians should perform the installation and maintenance. Connectors are designed for installation on one atmosphere vessels. Contact SEACON for recommendations if using compensated vessels.

Torque values referenced in this literature assume installation into dry metal threads. For other applications, please contact SEACON for rec-

BULKHEAD CONNECTOR (BC): The BC may be installed using one of two methods. The preferred method is to spotface the bulkhead surface and thread the hole, then screw the connector by means of a nut and washer. The bored hole (or threaded hole) should be free of any "burrs" and all o-ring sealing surfaces polished to a number 32 finish. Lubricate the BC o-ring with an appropriate silicone spray or grease before installing. This lubrication should be applied to form an adequate film. Excessive lubrication is detrimental to the operation of the connector. Bulkhead nut, if used, should not be over-torqued.

IN-LINE CONNECTOR: Lubricate the sealing areas around the male pins, using an appropriate silicone spray, or grease lightly.

The ALL-WET connectors require very little maintenance. They are designed to be used in harsh environments and thus limited amounts of dirt and grit do not affect their performance.

It is recommended that, upon disconnecting or retrieving the system, the connectors be cleaned, to storage (if possible, remate with dummy plugs). Prior to deployment the following maintenance procedure is recommended:

- 1. Demate the connector set.
- 2. Flush connector interface with fresh water (deionized water if available), remove all dirt, grit and grease.
- 3. Inspect for damage in sealing areas, excessive corrosion, debonding of the cable and connector interface and cuts in the cable jacket.
- 4. Apply thin film of dilectric compound (DC) grease, silicon based, to sealing areas of male connector and across the face of the female connector*. If the BC is removed from it's housing then replace facial o-ring and make sure that o-rings are lubricated and in good
- 5. Mate the connector halves, wipe away any excess grease off the interface line of the mated set.
- * CAUTION: The use of some oil-based propellants in spray cans can cause conductivity problems in neoprene.

Avoid sharp bends in cables. Cables subjected to vibration or exposed to seawater drag should be adequately clamped to prevent conductor fatigue and ultimate failure.
