

CIRCULAR AND DIN - A FLEXIBLE, DEPENDABLE SOLUTION

FOR MULTIPLE APPLICATIONS

**A trusted system of connectors
to support growing industry needs**

As vehicle life cycles grow longer, connectivity solutions are expected to perform dependably through extreme conditions throughout a variety of applications. With a wide range of accessories, in-line or 180 degree header configurations and a broad contact offering, the circular and DIN connectors are designed for deployment throughout the vehicle.

Rugged construction, integrated secondary locking features, and IP67 and IP69K (with cover) water and dust ingress ratings enable dependable performance in extreme conditions, including meeting the high vibration requirements found in motor and gearbox applications.
