(State or other jurisdiction
of incorporation or
organization)

001-33260

(Commission
File Number)

**Mühlenstrasse 26
CH-8200 Schaffhausen
Switzerland**

(Address of principal executive offices, including zip
code)

**John S. Jenkins, Jr.
610-893-9800**

(Name and telephone number, including area code, of the person to contact in connection with this report.)

Check the appropriate box to indicate the rule pursuant to which this form is being filed, and provide the period to which the information in this form applies:

☒ Rule 13p-1 under the Securities Exchange Act (17 CFR 240.13p-1) for the reporting period from January 1, 2023 to December 31, 2023.

Section 1 — Conflict Minerals Disclosure

Item 1.01 Conflict Minerals Disclosure and Report

This Form SD of TE Connectivity Ltd. (the “Company”) is filed pursuant to Rule 13p-1 promulgated under Section 13(p) of the Securities Exchange Act of 1934, as amended, for the reporting period January 1, 2023 to December 31, 2023.

A copy of the Company’s Conflict Minerals Report is provided as Exhibit 1.01 to this Form SD and is publicly available on our website at <http://investors.te.com/financial-reports/sec-filings/default.aspx>. The website and the information accessible through it are not incorporated into this Form SD.

Item 1.02 Exhibit

As specified in Section 3, Item 3.01 of this Form SD, the Company is filing this Conflict Minerals Report as Exhibit 1.01 to this report.

Section 2 — Resource Extraction Issuer Disclosure

Item 2.01 Resource Extraction Issuer Disclosure and Report

Not Applicable

Section 3 — Exhibits

Item 3.01 Exhibits

The following exhibit is filed as part of this report:

Exhibit No.	Description
1.01	Conflict Minerals Report of TE Connectivity Ltd. for the period January 1, 2023 to December 31, 2023

SIGNATURES

Pursuant to the requirements of the Securities Exchange Act of 1934, the registrant has duly caused this report to be signed on its behalf by the duly authorized undersigned.

TE CONNECTIVITY LTD.

By: /s/ John S. Jenkins, Jr.

Date: May 30, 2024

Name: John S. Jenkins, Jr.

Title: Executive Vice President and General Counsel

TE Connectivity Ltd.
Conflict Minerals Report
For The Calendar-Year Reporting Period Ended December 31, 2023

1. OVERVIEW OF TE'S CONFLICT MINERALS PROGRAM

This Conflict Minerals Report (Report) has been prepared by TE Connectivity Ltd. (herein referred to as TE, the Company, we, us, or our) pursuant to Rule 13p-1 (the Rule) promulgated under Section 13(p) of the Securities Exchange Act of 1934, as amended (Exchange Act). The Rule imposes certain reporting obligations on those Securities and Exchange Commission (SEC) registrants, like TE, whose manufactured products contain conflict minerals that are necessary to the functionality or production of their products. The term "conflict minerals" is defined to mean cassiterite, columbite-tantalite (coltan), gold, wolframite, and their derivatives, which are limited to tin, tantalum, and tungsten (together, 3TG). The term "Covered Countries" for purposes of Section 13(p) and the SEC rules thereunder, as well as this report and the accompanying Form SD, are the Democratic Republic of the Congo, and the adjoining countries of the Republic of the Congo, the Central African Republic, South Sudan, Uganda, Rwanda, Burundi, Tanzania, Zambia and Angola.

In 2023, we designed and manufactured products to connect power, data, and signal in a broad array of industries, including automotive, energy, industrial, data communications, appliances, medical, and aerospace and defense. Our principal product families included terminals and connector systems and components, sensors, interventional medical components, relays, heat shrink tubing, wire and cable, application tooling, and antennas.

For the 2023 reporting period, our reasonable country of origin inquiry (RCOI) survey process targeted a refined list of products deemed in scope for having any quantity of tin, tantalum, tungsten or gold that is "necessary to the functionality or production" of these products within the meaning of Section 13(p) and the SEC's Rule and Form SD thereunder (necessary conflict minerals). We continue to refine our survey process as part of our continuous efforts to bring the TE Conflict Minerals Program into greater alignment with the Organisation for Economic Co-operation and Development (OECD) Due Diligence Guidance for Responsible Supply Chains of Minerals from Conflict-Affected and High-Risk Areas, Third Edition, and the supplements thereto relating to tin, tantalum, tungsten and gold (OECD Due Diligence Guidance). The OECD Due Diligence Guidance has been identified by the SEC as an appropriate internationally recognized framework for conducting the RCOI and due diligence relating to necessary conflict minerals called for by Section 13(p), the Rule and Form SD. TE supplier information gathering is facilitated by a third-party compliance information gathering service (TPCS) provided by a leading software-as-a-service solution.

2. COMPANY MANAGEMENT SYSTEMS

In alignment with Step 1 of the OECD Due Diligence Guidance, TE has policies, management systems and controls to support supply chain due diligence related to 3TG. TE is also a member of the Responsible Minerals Initiative (RMI), an initiative of the Responsible Business Alliance (RBA) (formerly known as the Electronic Industry Citizenship Coalition) and actively contributes to several RMI sub-committees or working groups.

Responsible Minerals and Materials Policy

We have a Responsible Minerals and Materials Policy (Policy) related to our sourcing of 3TG and a formalized Conflict Minerals Program for our suppliers which is governed by an official standard operating procedure (Program). Our Policy is publicly available on our website at <https://www.te.com/us-en/utilities/product-compliance/conflict-minerals.html>. TE's conflict minerals requirements are also set forth in our Global Terms and Conditions of Purchase, supply contracts and our supplier code of conduct, the *TE Guide to Supplier Social Responsibility*. Supplier's compliance with TE's Policy is a standard requirement of doing business with TE.

Internal Management Structure

Our management system includes:

- The TE Conflict Minerals Core Team (Core Team) consists of Global Supply Chain Legal, Procurement Compliance, and TEIS support. The Core Team is responsible for:
 - o Developing and guiding TE's strategic direction to satisfy global conflict mineral requirements (specifically to establish and maintain a system of controls and transparency over the mineral supply chain);
 - o Developing and maintaining work product, policies, standards and processes; and
 - o Serving as TE's designated conflict minerals subject matter experts.
- The TE Conflict Minerals Steering Committee (Steering Committee) consists of other subject matter experts and executive leadership from functions such as Procurement (with representatives from each business unit and center led Procurement), Engineering, Finance, and Legal, which met regularly throughout 2023 and early 2024 to discuss the supply chain compliance process relating to conflict minerals. The Steering Committee is responsible for:
 - o Implementing our conflict minerals compliance strategy;
 - o Strengthening TE's engagement with suppliers; and
 - o Mitigating conflict mineral-related risks arising from TE's operations.

Control Systems

- Internal and Supplier Controls. Controls include (1) the *TE Guide to Ethical Conduct* that outlines expected behaviors for all our employees, (2) the *TE Guide to Supplier Social Responsibility* that outlines expected behaviors relative to fair employment, decent working conditions and rights for suppliers' employees and workers in their value chain, (3) supply contracts and Global Terms and Conditions of Purchase containing a responsible minerals clause requiring suppliers to provide TE with information about their source of 3TG and smelters/refiners, and (4) if required, termination and supplier blacklisting processes that disqualify certain suppliers, who refuse or are unable to provide additional conflict minerals data or move away from certain smelters, from doing business with TE. In addition, as discussed in the "Grievance Mechanism" portion of this Report, TE has established a confidential reporting mechanism which allows for anonymous submissions. As reported last year, the *TE Guide to Supplier Social Responsibility* was updated in December 2022, which (1) updated the conflict minerals section for consistency with our supply contracts and Global Terms and Conditions of Purchase to further outline supplier expectations and (2) added new supply chain mapping requirements.
 - Internal Executive Certification Process. As an additional Program integrity control, each year we seek certifications from our business segment presidents, supply chain executives, and our segment and business unit operations leaders on behalf of their respective function to ensure that components and raw materials that go into TE's products are subject to TE's 3TG due diligence.
 - TPCS Controls. Given the size and complexity of TE's supply chain, TE utilizes a leading compliance service provider to aid and enable our supplier survey efforts. Various programmatic and supplier management processes include (1) recognizing the Conflict Mineral Reporting Template (CMRT) developed by the RMI as the standard form uploaded into the system, (2) validating completion of the CMRT, (3) verifying the number of parts responded and number of smelters declared, (4) identifying smelter risk assessments, (5) ensuring functionality of the system, and (6) providing internal and external training and technical support. These measures serve as de facto means of validating the data we get from our TPCS.
-

- **3TG SOR Due Diligence.** As an additional Program control, we stay abreast of due diligence practice developments relating to smelters and refiners. We do not typically have a direct relationship with 3TG smelter or refinery processing facilities (SOR). We do, however, participate with other major manufacturers in an industry-wide initiative to develop compliant supply chains, including the RMI's Responsible Minerals Assurance Process (RMAP), and we look to our TPCS to provide guidance on various smelter related issues, including risk assessment, throughout the survey year.

Maintain Records

Program data is stored in accordance with our corporate records retention schedule to ensure that relevant materials are preserved for appropriate periods.

Supplier Engagement

We have adopted a number of supplier outreach tools developed by our TPCS, including but not limited to training and program materials, which are designed to encourage suppliers to develop their own conflict minerals due diligence programs in accordance with the SEC's conflict minerals regulatory requirements. We also maintain a TE Supplier Portal which directs suppliers to informational resources related to conflict minerals and our Policy. We also include our Policy as part of our supplier onboarding process.

Grievance Mechanism

We encourage our employees, as well as suppliers, investors, customers, and other third parties, to promptly report any concerns of potential violation of laws, regulations, and TE policies via any of TE's confidential reporting channels, including ConcernNET, ConcernLINE, ConcernAPP or by email at directors@te.com. The ConcernNET web reporting platform, the ConcernLINE hotline numbers, and ConcernAPP are available 24 hours a day, seven days a week and can be accessed through the link below.

All reports of potential violations are taken seriously and appropriately reviewed and handled by the TE Office of Ombudsman; an independent, impartial, and confidential resource which employees, suppliers, investors, customers, and other third-parties can report concerns of potential violations. Additional information on the TE Office of Ombudsman may be found at the link below:

<https://www.te.com/usa-en/about-te/corporate-responsibility/governance/ombudsman.html>

3. IDENTIFY AND ASSESS RISKS IN THE SUPPLY CHAIN

Due Diligence Performed

In alignment with Step 2 of the OECD Due Diligence Guidance as applicable to downstream companies such as TE, our due diligence measures as outlined below have been designed to identify and assess risks in our supply chain. As discussed above, the OECD Due Diligence Guidance has been identified by the SEC as an appropriate (and thus far, the only), internationally recognized due diligence framework for purposes of Section 13(p) of the Exchange Act and the Rule and Form SD thereunder.

Supply Chain — Reasonable Country of Origin Inquiry (RCOI)

The products that we manufacture are complex, and we utilize thousands of components from many direct suppliers. We have relationships with a vast network of suppliers throughout the world and there are generally multiple tiers between the 3TG mines, SORs, and our direct suppliers. Therefore, we must rely on our direct suppliers to work with their upstream suppliers (suppliers that are closer to the SORs than TE in the supply chain) to provide us with accurate information about the origin of 3TG in the components and raw materials we purchase. We work to implement contracts with those direct suppliers to impose contract terms that compel these suppliers to support our due diligence efforts with respect to 3TG content.

Because of the complexity and size of our supply chain, we developed a risk-based approach to determine whether we had any necessary 3TG in our supply chain. Each year TE's raw material and commodity code groupings are reviewed for the presence of potential 3TG. Once those products and materials are identified, internal subject matter experts and engineers analyze whether the 3TG in the products and materials are "necessary to the functionality or production" of such products within the meaning of the SEC's rules. The result of that analysis leads to the identification of in-scope supplier products potentially at risk of containing necessary conflict minerals.

Our 2023 supplier survey campaign requested that the identified suppliers provide information to us regarding 3TG and SORs using the CMRT. We accept company level CMRTs from suppliers, and, when necessary, seek additional information and/or product level CMRTs. As in past years, some supplier responses continued to note that the source of the conflict minerals could not be ascertained at the time of the supplier's response.

Description of Products Containing "Necessary" Conflict Minerals

In 2023, we identified a total of approximately 183,602 products (including components) supplied to TE that potentially contained one or more 3TG minerals necessary to the functionality or production of our products and subject to our RCOI survey. These products fall into all of our product families.

We were unable to ascertain the country of origin of 3TG minerals necessary to the functionality or production of all of the identified TE products and, as a consequence, proceeded to conduct the due diligence required under the OECD Due Diligence Guidance as applicable to downstream companies.

Efforts to Determine Mine or Location of Origin

We have determined that requesting the identified suppliers to complete the CMRT, together with resources offered by our TPCS, constitute our reasonable efforts to determine the mines or locations of countries of origin of necessary 3TG in our supply chain. We have reached this conclusion in part as a result of our membership in the RMI (whose efforts focus on the location and the commitment of smelters and refiners to go through its RMAP or participate in a recognized auditing program), our understanding of the OECD Due Diligence Guidance, and based on consultation with compliance and sustainability leaders in companies similarly situated to TE. TE relies on the RMI to help keep us abreast of developments in conflict minerals sourcing, the evolution and refinement of the CMRT form, and process improvements and informal benchmarking opportunities with other members.

Smelters or Refiners and Country of Origin of 3TG

We attach a complete listing of those SORs reported, through TE's supplier responses to the CMRT or upon further inquiry after a review of such responses, as providing necessary conflict minerals to TE for manufacture in 2023 (Exhibit A). Regarding country of origin, TE relies on third-party assessments and information available from such sources as RMI's RMAP and RCOI reports, the London Bullion Market Association (LBMA), as well as our assessment of our supplier responses, and concluded that TE, at this time, does not have sufficient information to conclusively determine the countries of origin of the 3TG for every TE product.

We survey direct suppliers of components or raw materials that were in scope for containing 3TG that were "necessary to the functionality or production" of our products described above. For 2023, TE relied on our TPCS to facilitate our supplier survey. In 2023, approximately 432 commodity codes and 183,602 associated TE products required RCOI survey activity due to their risk profiles.

Survey Responses for TE Products

We received a supplier response rate of 82.3% of the in-scope TE products surveyed, which shows an incremental increase in our response rate. We reviewed the responses against internally developed criteria to determine which suppliers required further engagement. As in past years, the review criteria included assessing incomplete responses as well as inconsistencies within the data reported by those suppliers, and we have worked directly with suppliers to obtain additional engagement in an effort to secure improved responses. From the responses received, the following statistics were compiled:

- Approximately 62,880 products were reported as out-of-scope by suppliers – meaning that they did not contain necessary conflict minerals. TE has an internal process with our Engineering teams or subject matter experts that validate the product is out-of-scope and does not contain conflict minerals.
- Approximately 88,231 products were deemed to contain necessary conflict minerals.
- Approximately 22,469 products were determined to be low risk under TE's analysis; either by way of the RMAP process, TE's risk assessment, or being derived from recycled or scrap sources.
- Approximately 62,147 products were determined to be medium risk under TE's analysis meaning that our relevant suppliers were unable to identify either the country of origin or the mine/SOR of origin.

We attribute our steady increase in supplier response rate to an increased supplier outreach designed to improve our response rate.

Lastly, we have seen an increase in high-risk smelters compared to prior years due to government sanction-related activity or other criteria, which has resulted in more smelters being deemed nonconformant. We continue to be guided by inputs and guidance from industry leading sources and continue to develop our response and remediation measures to remediate the high-risk smelters in our supply chain over time. Since the smelter data in our CMRT and this Report reflect data collected from our suppliers in the past year, we expect that our Company Level CMRTs may continue to include high-risk smelters relating to sanction-related activity until we can successfully work with our supply base to either remediate or remove sanctioned smelters from our supply chain.

4. DESIGN AND IMPLEMENT A STRATEGY TO RESPOND TO RISKS

In alignment with Step 3 of the OECD Due Diligence Guidance, we have designed and implemented a strategy to manage risks as follows:

- Senior management is briefed about our due diligence efforts on a regular basis.
 - Executive leadership is in a position to influence the outcome of the Program through either financial or administrative supports and to certify alignment with the centralized RCOI survey and company due diligence processes and affirm direct knowledge and supervision of such activities.
 - As outlined in the Management Systems above, we have a Policy, *TE Guide to Supplier Social Responsibility* and contractual provisions, which impose requirements on our direct suppliers as a condition of doing business with TE.
-

- We have implemented and continue to follow a risk management plan that outlines our responses to identified risks and created a new key performance indicator related to high-risk smelters for increased visibility and risk assessment.
- We have a remediation process in place for addressing high-risk smelters. Surveying our supply base is a continual, ongoing process and TE takes prompt action to address high-risk smelters. However, given the size and complexity of our supply chain, removal may take time. When we have not received a response from a supplier – we block business on the part in question.
- Suppliers are expected to have a supply chain aligned with the principles and practices of the RMI or an OECD compliant program.
- Data validation enhancements assure integrity of data received and reliability for reporting.

5. CARRY OUT INDEPENDENT THIRD-PARTY AUDIT OF SUPPLY CHAIN DUE DILIGENCE AT IDENTIFIED POINTS IN THE SUPPLY CHAIN

We do not typically have a direct relationship with 3TG smelters and refiners and therefore do not perform or direct audits of these entities. However, in alignment with Step 4 of the OECD Due Diligence Guidance, we support SOR audits conducted by independent third parties through our RMI membership and have obtained the RMI list of “RMAP Conformant” smelters and refiners. As outlined in our Policy, we also expect our suppliers to source from conformant or active SORs that have been validated through third party accredited audits such as RMAP, LBMA or other recognized auditing schemes. We continue to examine how best to improve our upstream diligence efforts, possibly in tandem with our third-party conducted supplier social responsibility audits and human rights/modern slavery due diligence.

6. REPORT ON SUPPLY CHAIN DUE DILIGENCE

Consistent with Step 5 of the OECD Due Diligence Guidance, this Conflict Minerals Report constitutes our annual report on our 3TG due diligence and is publicly available on our website, along with the accompanying Form SD, at <http://investors.te.com/financial-reports/sec-filings/default.aspx> as well as our Conflict Minerals website at <https://www.te.com/en/utilities/product-compliance/conflict-minerals.html>. In addition, this Report and the accompanying Form SD have been filed with the SEC and are publicly available on the SEC’s website at <https://www.sec.gov>.

Results of Due Diligence

Based on our due diligence, notwithstanding continued improvements made to our RCOI and due diligence processes, we are unable to determine with absolute assurance, the origin of all the necessary conflict minerals in our products for the 2023 reporting period (January 1 through December 31, 2023), and therefore cannot exclude the possibility that some of these minerals may have originated in one or more of the Covered Countries (beyond those identified herein) and are not derived from recycled or scrap sources.

Steps to be Taken in 2024 to Mitigate Risk

We intend to take the following steps as continuous improvement measures to improve our due diligence to be conducted in 2024, to further mitigate the risk that any necessary 3TG in our products finance or benefit armed groups in any of the Covered Countries:

- Increased focus on internal training to help improve engagement with suppliers reporting high risk smelters. Notably, this effort should also help TE address the increased number of high-risk smelters due to sanction-related activity.
 - Drive increased awareness and update training materials related to smelter remediation to address the increase in nonconformant and/or high-risk smelters.
 - Work directly with suppliers to continue to improve overall supplier response rate.
 - Engage any suppliers if found to be providing us with components or materials containing 3TG from sources that finance or benefit armed groups (as that term is defined in Section 13(p) and Item 1.01(d)(2) of Form SD) in the Covered Countries to establish an alternative source of 3TG that does not support the activities of any such group.
 - Continue to provide training and tools (by way of our TCSP) to those suppliers who want to build supply chain transparency via their own programs.
-

Cautions Concerning Website Information and Forward-Looking Statements

Other than any documents expressly incorporated by reference in this Conflict Minerals Report and/or the accompanying Form SD, the information on any of our websites referred to in this report is not part of this report or any other document filed with the SEC, including but not limited to the accompanying Form SD.

Certain statements in this report may be “forward-looking” within the meaning of the U.S. Private Securities Litigation Reform Act of 1995. Words such as “expects,” “intends,” “plans,” “projects,” “believes,” “estimates,” “targets,” “anticipates,” and similar expressions are used to identify these forward-looking statements. Examples of forward-looking statements include statements addressing our future financial condition and operating results, other information relating to our future plans, and any other statement that does not directly relate to any historical or current fact. Forward-looking statements are based on our current expectations and assumptions, which may not prove to be accurate. These statements are not guarantees and are subject to risks, uncertainties and changes in circumstances that are difficult to predict. Actual outcomes and results may differ materially from those anticipated in any of our forward-looking statements. Risks that may cause these forward-looking statements to be inaccurate include: failure to carry out these plans in a timely manner or at all; lack of cooperation or progress by our suppliers, and their respective suppliers and smelters; lack of progress by smelter programs for conflict minerals (including the possibility of inaccurate information, fraud and other irregularities) or that these plans may not be effective. In addition, you should also consider the important factors described in reports and documents that we file from time to time with the SEC, including the factors described under the section titled “Risk Factors” in the Company’s most recently submitted Quarterly or Annual Reports. As a result, these statements speak only as of the date they are made and we undertake no obligation to update or revise any forward-looking statement, except as required by federal securities laws.

Exhibit A – Smelters identified which, to the extent known, processed necessary conflict minerals in TE products based on CMRT responses received from our suppliers for Calendar 2023 Reporting Period.
