

# WIRELESS VIBRATION SENSORS

The Industrial Internet of Things (IIoT) evolution is driving demand for remote condition monitoring systems in various industries. TE Connectivity's series of wireless vibration sensors allow you to easily and reliably monitor and analyze your critical equipment from anywhere, at any time.

## FEATURES

### TOTAL APPLICATION FLEXIBILITY

Multiple options available with Bluetooth or LoRaWAN™ connectivity, and single or tri-axial designs, depending on your needs.

### EARLY DETECTION & DIAGNOSIS

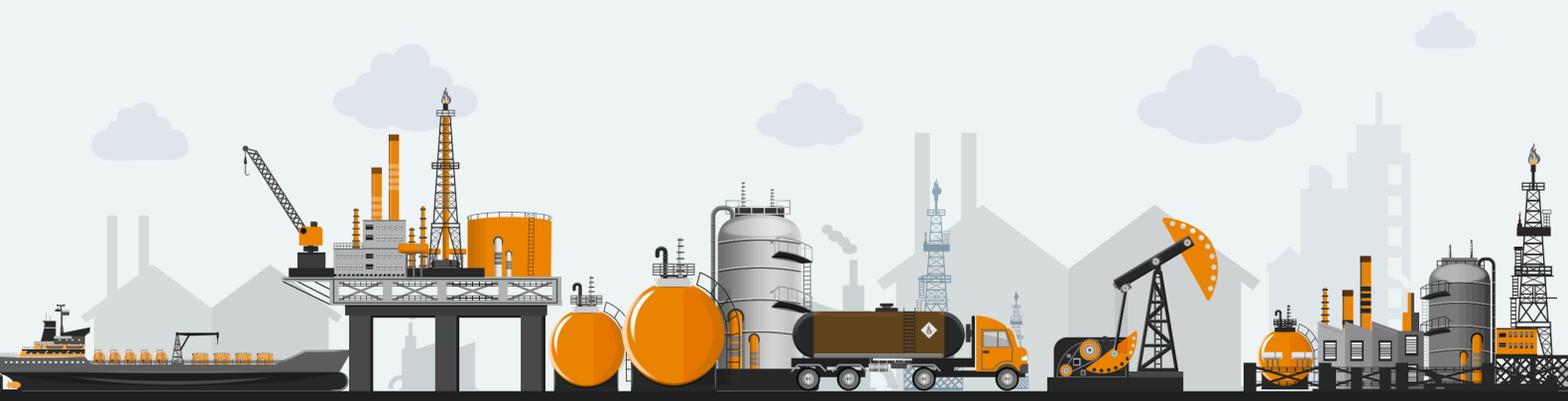

Edge computing and wide bandwidth capability to enable early detection & diagnosis of equipment issues.

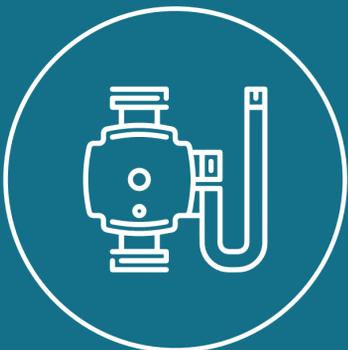

### INTRINSICALLY SAFE

IP6X-sealed, weather resistant sensor certified for ATEX/EX-/C1D1 hazardous and potentially explosive atmospheres.

## APPLICATIONS

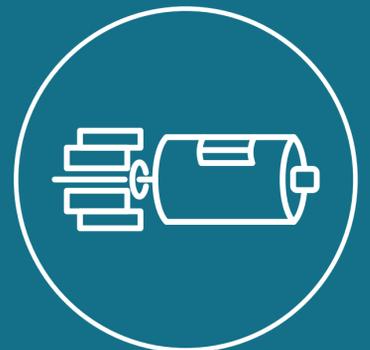

## INDUSTRIAL CONDITION MONITORING

PUMPS

MOTORS & DRIVES

TURBINES
