

CUSTOM, RUGGED, RELIABLE HYDRAULIC LVDT SENSORS

TE Connectivity has one of the broadest ranges of LVDT position sensors designed to meet the harsh environment demands of hydraulic applications.

BENEFITS

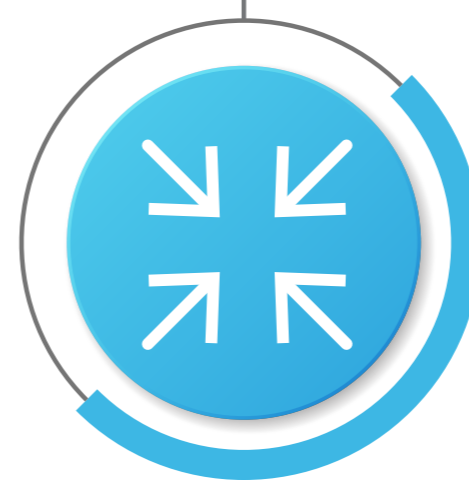

ACCURATE

LVDTs enable better system control and low accuracy error with fast response time.

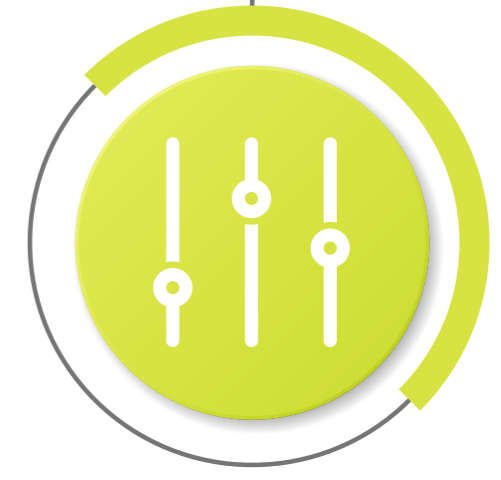

RELIABLE

Hermetically sealed capable of withstanding high pressure and harsh media exposure.

COMPACT

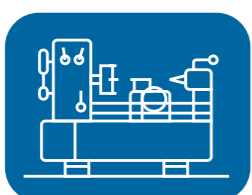

Ability to fit in restricted spaces and maximize stroke length in a given area.

ADAPTABLE

Broad range of standard designs and the ability to create custom solutions based on application requirements.

APPLICATIONS

INDUSTRIAL

- Injection Molding
- Die Casting & Stamping Press
- Robotics & Assembly Equipment

INDUSTRIAL COMMERCIAL TRANSPORTATION

- Construction & Agricultural Equipment
- Boom Lifts & Material Handling
- Mining Vehicles
